# COLLEGE DATA ADAPTER

The way ahead

Poor integration between enterprise resource planning (ERP) and learning management systems (LMS) like Ellucian® Banner and Canvas by Instructure is a common source of frustration for faculty, staff, and students. Manual data entry and data inaccuracy slow faculty productivity. Students registering for coursework may find the process painful or uneven. With IT staffing and expertise in short supply, these problems persist to the point of acceptance.

College Data Adapter synchronizes data between your ERP system and LMS in real time. Important features like course cross-listing, grade sync, and event scheduling streamline registration and course materials access, and enhance enrollment capture during peak registration periods. College Data Adapter is customized, installed, and tested in as little as 30 days, with ongoing monitoring and remediation included.

Reliable, secure ERP and LMS data synchronization

Accurately aligning data between your ERP and LMS systems is a common and time-consuming problem. Manual entry is prone to error while in-house software solutions can be difficult to manage or pose unforeseen security risks. As a cloud-based managed IT service with monitoring and remediation included, College Data Adapter removes the uncertainty.

College Data Adapter delivers reliable, secure synchronization of Banner and Canvas data, freeing up valuable IT staff to focus on strategic priorities, without sacrificing system security and performance. Key features include:

- High availability failover
- Single tenant for optimized performance and security
- QA and production environments included
- Scalable and flexible to adapt to growth and change

■ Pain-free deployment and management

While accurate data synchronization between LMS and ERP systems can be an ongoing source of pain, worries over campus disruption can keep campus IT teams from moving off the status quo. College Data Adapter is installed, customized, tested, and in production in as little as 30 days, with ongoing monitoring and remediation baked in.

College Data Adapter helps you overcome gaps in talent and expertise to synchronize ERP and LMS data in real-time. Beyond its low-touch, near maintenance-free footprint, campus IT teams will enjoy:

| Baseline ERP technology | Expert, guided implementation | 30–60-day deployment | Pain-free ERP upgrades |

A quick win for campus IT

Transitioning higher education IT from cost center to campus innovator requires breaking away from low-value operational tasks and finding new ways to deliver value to your school. We can help you do both.

With real-time synchronization of ERP and LMS data to eliminate user frustration, speed productivity, and enhance enrollment capture during peak registration periods, we can help you near-instantly transform your on-campus IT reputation and free up in-house talent and expertise to innovate. Key features include:

- Grade sync to speed up grade entry and avoid inaccuracy
- Multiple synchronization options to match any business process
- Section cross-listing support

Ready to bring advanced connectivity to your campus?

Boldyn Networks delivers the advanced shared network infrastructure needed for a smart, inclusive, and sustainable future. We enable connected transit, venues, enterprises, heavy industry, college campuses and smart cities to create new possibilities in the way people live, work and play.

We don't just talk about the future. We exist to help build it. Creating the foundation from which a better collective future can be imagined.
