

INNOVATION, SUPPORT AND EXPERTIZE FOR AN INTERCONNECTED FUTURE

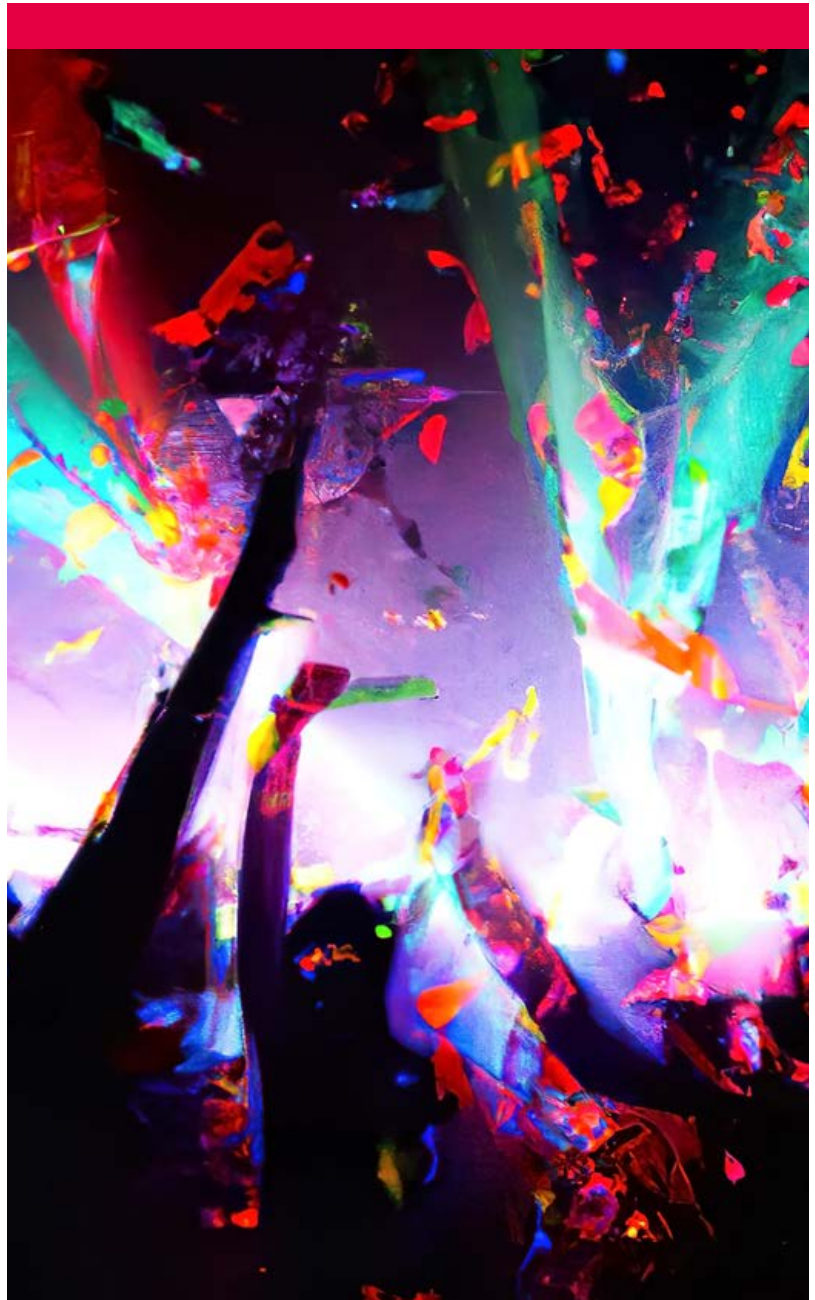

The needs of tomorrow call for robust and secure connectivity. We make it happen.

■ Advanced shared network infrastructure.

**Cutting-edge connectivity solutions.
Full-service network management. We enable transport systems, venues, enterprises and cities to create new possibilities for people to live, work and play.**

We offer a full portfolio of network solutions that connect people, enrich communities and advance economies. We've connected more than 300 marquee venues, five public transport networks with a total of over six billion rides a year, the world's largest offshore wind farm, and several prominent cities with 120k small cells sites and over 2k miles of fiber in major cities. Whatever and wherever you need to connect, we can help you do it.

Innovative solutions for limitless possibilities

Small cells and towers

Our dense small cell and tower networks improve connectivity across 5G, LTE and Wi-Fi. Neutral hosting means you can roll out infrastructure faster with less upfront capital – and upgrade easily as technology requirements evolve.

DAS

A distributed antenna system (DAS) provides seamless, scalable support for apps, IoT devices, machines and anything else you need to connect. Get rid of dead spots. Keep signal strength high. Deliver the best cellular coverage and capacity, anywhere.

Private networks

We deliver 4G LTE or 5G coverage wherever you need it and whatever you need it for. With a private wireless network, you get complete control and a tailored solution just for you. With lower latency and dedicated bandwidth for unmatched reliability.

Wi-Fi

Whether it's a private Wi-Fi network or a public hotspot, we can design and deploy a solution tailored to your unique wireless environment. Giving you the high-speed, high-capacity Wi-Fi connectivity you need to deliver personalized, world-class experiences.

Fiber

If you need it connected, we can connect it. Our neutral host fiber networks span thousands of miles and connect some of the world's biggest cities. Delivering fast, reliable connectivity between buildings, underground and anywhere else.

IoT applications

Smart stadiums. Smart transit. Smart industry. Smart cities. Our powerful networks deliver the fast speeds, high capacity and broad coverage you need to support any IoT application.

Co-location services

Get the benefits of a fast deployment without the huge upfront costs using our co-located data centres, towers and more. And enjoy always-on connectivity – because we monitor our sites 24/7 for maximum reliability.

Consulting services

Need a network strategy? Want to design a custom network or optimize an existing one? Have a telecom project that needs managing? Let us know what you're looking for, and we'll make it happen.

Data and analytics

Your network generates huge amounts of data every day. We can help make your data work for you. Improve coverage. Tailor advertising to your target audiences. Deliver a better customer experience. Grow your revenue.

Creating connections across industries

We can deliver the right network for any organization in any industry.

Network operators

We build and manage networks so network operators don't have to. Our 5G small cells, towers, DAS and other wireless infrastructure provides fast access to major markets and hard-to-reach areas. So network operators can focus on delivering the best service with less risk and upfront cost.

Venues and property owners

We work with some of the biggest sports and entertainment venues. Delivering best-in-class Wi-Fi and mobile coverage that let fans access mobile tickets, order snacks and merchandise from their seats, share updates on social media, and keep in touch with fellow fans or rivals. Our discreet wireless solutions are also ideal for commercial and residential real estate and hospitality venues. Providing high-quality connectivity throughout any property of any size to enable the ultimate guest, fan or tenant experience.

Healthcare, education and financial institutions

From hospitals to universities, our solutions let patients, students, visitors and staff use voice and data services wherever they are – even in hard-to-cover areas like stairwells, basements, labs and parking garages. Our advanced integrated indoor and outdoor networks deliver reliable campus-wide wireless coverage for communication, coursework, safety and more.

Transport authorities

Each day, millions of passengers depend on fast, reliable and secure connectivity. We've deployed shared communications infrastructure along public transport systems around the world. Advancing services and operations with data-informed insights as a strong, proven partner for transportation and airport hubs.

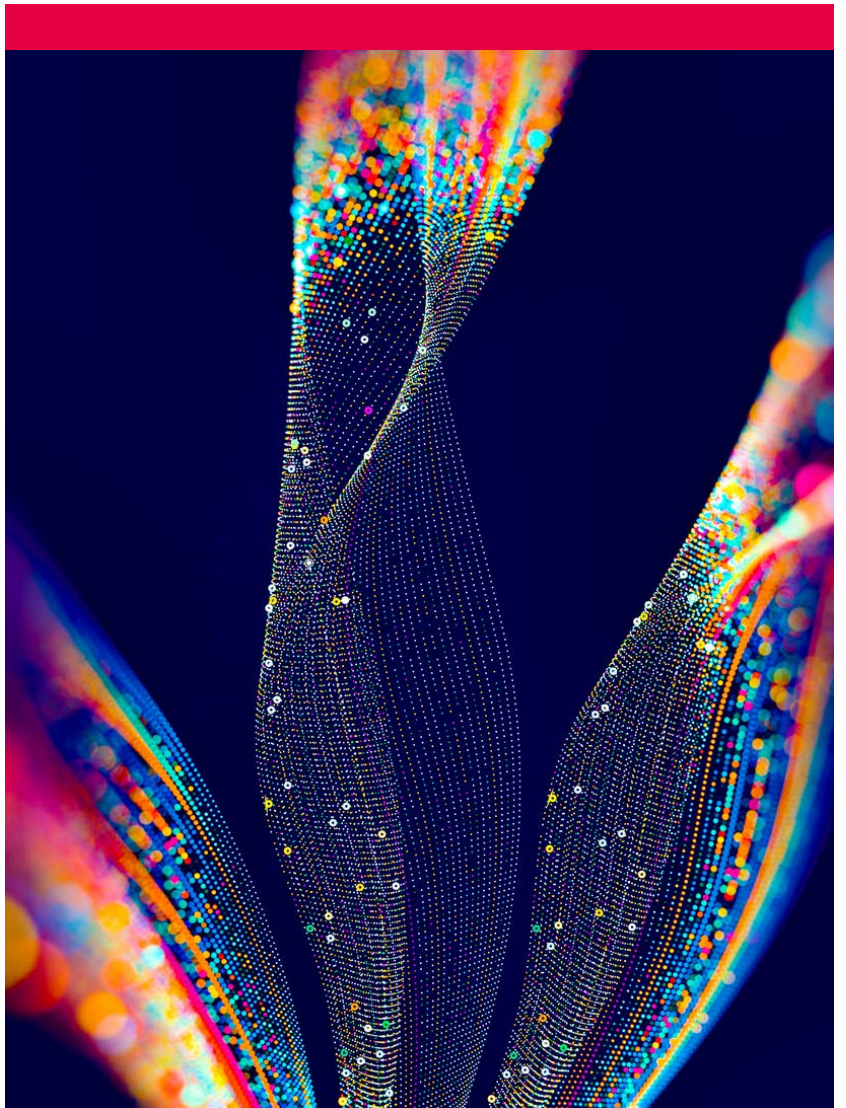

Cities, government and military

Custom solutions for cities and governments enable smart city infrastructure, smart digital services and wide-ranging connectivity that closes the digital divide. So governments can enhance citizens' lives, support the flow of people and goods, and help build the economies of the future. Our wireless solutions also improve speed, coverage and capacity on military bases – all vital to mission success and quality of life. Military personnel trust us to deliver innovative, next-generation solutions they can count on when it matters most.

Manufacturing, utilities and logistics

Keeping goods flowing, production lines running or power generation operating smoothly demands fast, low-latency, high-capacity connectivity. Our solutions deliver needed coverage even in hard-to-reach areas like offshore and underground facilities. Keeping workers safer and operations more efficient.

The Boldyn Networks advantage

A collaborative, customer-first approach. Industry-leading expertise. Unsurpassed technical know-how. It all adds up to the market's most cost-effective and efficient network deployments.

Capabilities

We have the expertise to design, build, deploy and manage high-capacity networks that provide coverage wherever you need it.

Creativity

No two environments are the same. We work with you to develop flexible, customized solutions that meet your specific connectivity needs.

Financial stability

We're majority-owned by the Canada Pension Plan Investment Board (CPP Investments) one of the world's most diversified funds. This gives us the resources to deliver on projects of all sizes.

End-to-end support

Our Network Operations Center (NOC) provides 24/7 monitoring and support to proactively address any issues.

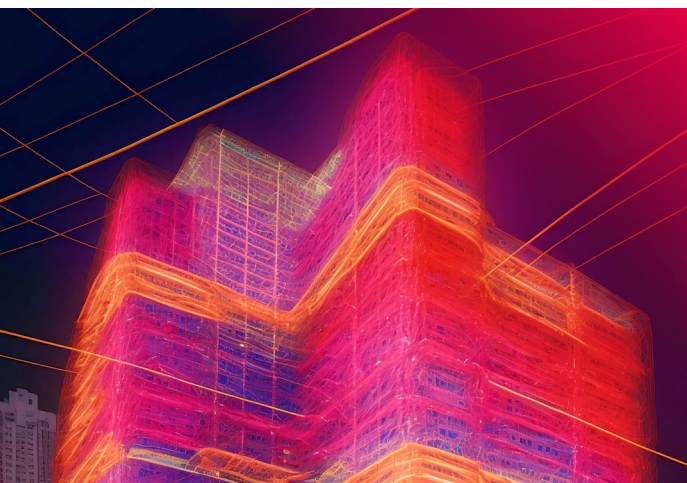

Trusted partnerships

We build close relationships – engaging with senior leaders and deployment teams alike – to ensure transparency and progress toward your goals.

Sustainability

Smaller rack footprints. Lower power usage. Fewer overall emissions. Our highly efficient systems reduce your carbon footprint and costs.

Ready to build connections that last?

Boldyn Networks is one of the largest neutral host providers in the world. We deliver the advanced shared network infrastructure needed for a smart, inclusive and sustainable future. From interconnected transit to venues, from enterprises to smart cities, we enable new possibilities in the way people live, work and play.
